Dear Business Partners ,

CUBICSO, has built its reputation on the strong commitment of values, ethics and integrity. It gives me immense pleasure and joy today to share details about our Corporate identity with you our Valued business partners. Warmest welcome to the world of CUBICSO Group. We are committed to grow in a manner where safety and client satisfaction will be the most priority. As we continue to look towards the future ,we aspire to reach both growth and excellence . We have consistently provided professionally safe and quality construction services to our clientele. Starting from establishing portable site offices ,material handling , Soil testing ,Topo Survey to deploying manpower, machinery for execution of the complex Civil and Mechanical project, our team has ensured timely project completion with quality, speed & safety .Our well trained team of 100 qualified engineers working in 14 states for our 3S vision of **Service for Excellence, Satisfaction for Vendors, Surety for Stake holders**. Our expert team of Engineers & Manpower (Skilled +Unskilled) along with best in class machinery becomes a winning combination for both of us and the Client. Our Work force is young and talented with average age of 31 Yrs. We are currently working in these three business sectors but not limited to any challenging opportunity .

Heavy Infrastructure Services

Industrial Services

Renewable Energy Services

We are ready to take up any construction related project with commitment of completing the Job on time with utmost safety and quality.

Looking for long term association with client and value addition to the nation .

regards,

Chief Executive Officer

CUBICSO Group

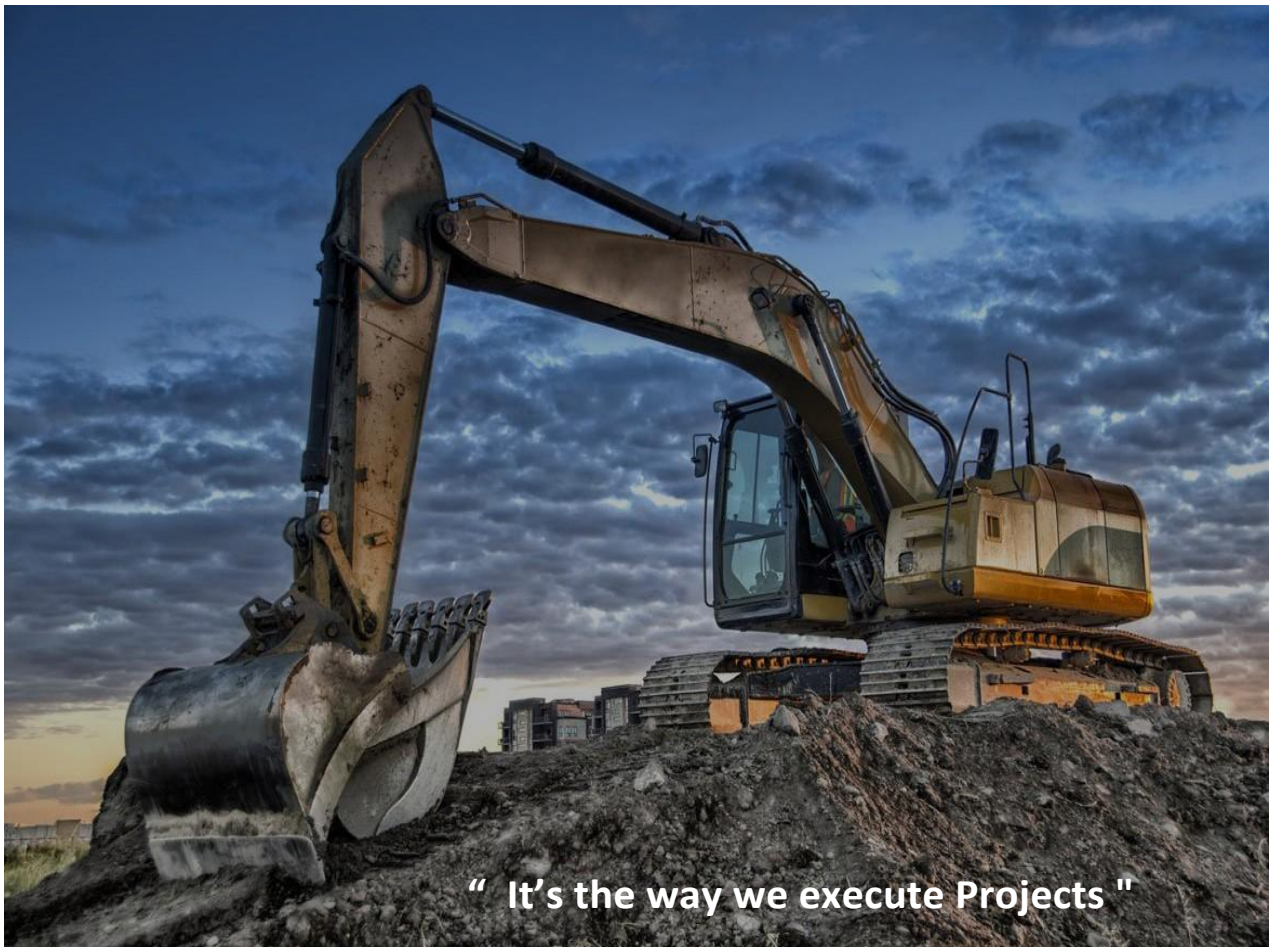

— WHO ARE WE

Over the last 6 years, CUBICSO Enterprise Private Limited has transformed from a small Sub-Contractor into a recognized leader in the construction industry, committed for executing Renewable energy Sectors ,Industrial Sectors and Heavy Civil infrastructure Project across India. We provide a range of traditional, design-build and engineering, procurement and construction (EPC) services for a large pool of client From Public Sector Units to Private Sector Unit .

We strive to stay at the forefront by investigating advancing technology as our organization grows, embracing industry changes and the needs of our clientele. We continuously diversify our skill set to separate us from our competition and foster loyal Client relationships through the breadth of expertise and our collaborative process, as well as our impeccable safety record and Client service.

We are committed to client satisfaction through excellent performance. To achieve this vision, we make every effort not just to meet client expectations, but to exceed them. We monitor our performance on all projects on Parameter of Safety ,Time and Quality as we enhance our processes, Client relationships, and industry recognition.

CUBICSO has developed an established project management approach to accommodate unique requirements for any project.

“ It’s the way we execute Projects ”

WHO ARE WE

OUR VISION

CUBICSO has a straight forward **3S vision** which reflects in its emblem also

- 1) Service for Excellence
- 2) Satisfaction for Vendors
- 3) Surety for Stakeholders

OUR MISSION

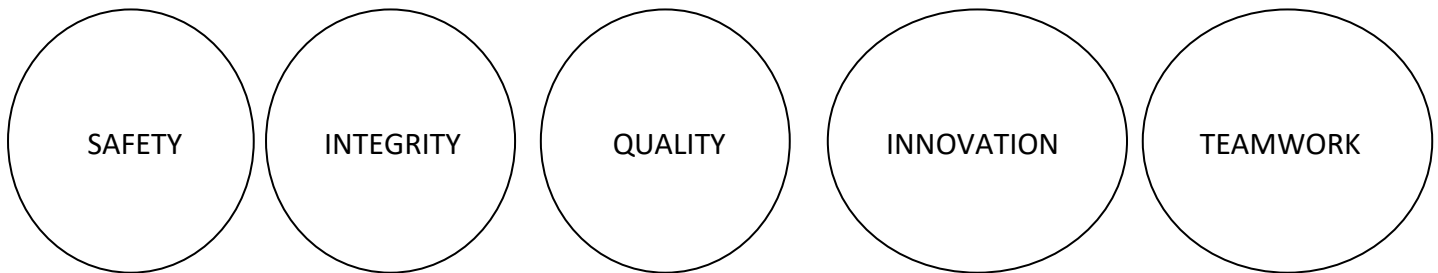

We strive to provide highest value to our Clients with a critical eye towards safety, quality & service.

We strives to grow as an organization through investigating advancing technology.

We strive to use advance tools and techniques to continuously improve our ability to deliver projects.

We strive to provide entrepreneurial environment to individuals, can live their passion for project.

OUR MOTO

SERVICES

Division of Heavy Infrastructure

CUBICSO is growing in experience on major civil projects. Our multidisciplinary team brings unparalleled qualifications and experience for executing Project. The coordination and management of every heavy/civil project poses unique challenges. Our teams focus on minimizing inconvenience to the local community and the public, accelerating the project schedule to meet critical milestones while exceeding owner expectations. The heavy/ civil group achieves these goals on each of our projects by providing quality technical solutions, seasoned construction personnel, and organizational structure that combines strong design, construction, and management principals with competence, creativity, and flexibility.

Our Expertise in Heavy Infrastructure Services and Major Highlights of Project Executed .

- **Bridge construction**

We are proudly associated with **Tata & Daewoo JV** for **Harbour Sea Link project Navi Mumbai.**

■ PILING WORKS

We have designed and executing soil improvement work by **Stone Pilling Method** for **13600mtr** under contracts **BHEL** Principal employer **NTPC Kerala**.

- **Earth work**

We have Completed earthwork of 260 acre for Volume **241453cum** For Clients/principal client like **MAHAGENCO, BHEL , ACCORD SYNERGY LTD, GNFC, GSECL** in 2019-20.

- **Piling Work**

We have Completed Piling for **39542 mtr** for Clients/principal client like **MAHAGENCO, BHEL ACCORD SYNERGY LTD, GNFC, GSECL** in 2019-20.

- **Bituminous Road**

Construction of 1.8 KM of Bituminous road near onshore portion of under contracts **BHARATIYA CONSTRUCTION** for Principal Employer **IOCL**

- **RCC Road & Structure Work**

We are proudly associated with **NHSRCL** for the RCC & Structural work for more than 2km with concrete volume of more than 1000 cum.

Division of Industrial Services

CUBICSO delivers a full spectrum of industrial services; including full engineering, procurement and construction (EPC), turnkey design-build, balance of plant (BOP) as well as subcontracting services.

Contractors working within industrial and chemical environments need to adapt to rapidly changing technologies and adhere to a stringent regulatory environment. Our team has over 10 years of experience and we stand ready to assist our clients with new construction as well as critical on-going maintenance to extend functionality, accommodate for a new technology, changing product lines or processing system upgrades.

Our industrial team has access to the necessary equipment needed for all civil or structural work, crane and heavy rigging as well as lift planning specialist to ensure safety, control costs and meet critical schedule guidelines

INDUSTRIAL SERVICES

Pre-construction site work
Material Handling
Foundations of Equipment

PETROCHEMICAL SERVICES

Structural steel erection
Piping Job
Erection of Equipments

Our Expertise in Division of industrial Services and Major Highlights of Project Executed

Pre-Construction Site works

CUBICSO has provided office Establishment to almost 25 sites for supply of Office Containers. all over India with having more than 55 office and 20 store containers .

Material Handling

We have all the material handling equipment like Hydra ,Crane ,Forklift along experience human recourses to execute material handling work to the perfection . We successfully handled electrical, mechanical material including Solar Module and structural material.

RCC Building & Foundation

We have executed foundation work for Switchyards, Heat Exchangers, Inverter Platforms, HT Panels, Transformers, Control Room Buildings.

Structural Steel Erection:

We have completed Boiler Erection and scaffolding Job at world's largest known oil refinery - Reliance Refinery Jamnagar, Gujarat in year 2015-16.

Piping Job:

We have completed 4" piping solutions at Sikka Thermal Power Station at Jamnagar, Gujarat for air handling systems in plant in year 2013-14.

Erection Of Equipments:

We have completed Scada Panels, PCU, HT Panels, Inverter Transformers, Auxiliary Transformers and SMBs at 15 MW Solar Power Plant of BHEL-GACL at Charanka Solar Park, Gujarat in year 2017.

Division of Renewable Energy Services

Solar power generation is an increasingly important source of sustainable energy, and it's getting more affordable, too. CUBICSO. has wide-ranging expertise in the renewable energy sector, and we work with our clients to utilize solar technology and help shape the renewable energy revolution.

CUBICSO. is already well-known across the country as a leading Solar Constructions Contractor, and we bring you that same expertise in project control and cost management to achieve excellent Client satisfaction in the growing solar energy field. We offer a full range of services and provide innovative solutions to fit a wide variety of location and terrain complexities, including ground-mounted PV installations or solar parking structures that make best use of available space and maximize your return on investment.

We spearhead utility-scale solar projects across the India, and our clients gain advantage from our proficiency as self-performing contractors. CUBICSO. installs photovoltaic, crystalline, and thin film modules, fixed, tilt-mounted modules, with single or dual-axis tracking systems.

We make it a priority to bring your project home on time and on budget, no matter what its scope, complexities, or site constraints, allowing you to benefit from the highest possible return on your investment while utilizing this abundant natural resource.

SOLAR POWER PROJECT SERVICES

- Feasibility studies and resource analysis
- Financial analysis and procurement capabilities
- Site planning including storm water management
- Grading & levelling of mountains or uneven surfaces
- Piling / Auguring of land with highly efficient machineries
- Assembly and erection
- Tracking system design and installation
- Foundation design and installation
- Permits and approvals

Full Engineering Investigations of Every Project

CUBICSO. performs full site engineering investigations on every solar project in order to properly manufacture piling for each project. Through these geological studies our team is able to develop a plan specifically to address soil conditions on each site in order to eliminate risk and ensure timely delivery of every solar project we build.

Quality Control Standards

- Proper site layout according to engineered drawings
- The construction of access roads and the necessary compaction requirements
- The excavation and construction of inverter pads
- The installation of foundation posts
- The installation of the structurally-approved racking system
- The installation of the solar modules to their assigned areas and the subsequent serialization of the module serial numbers.

CUBICSO. takes extreme pride the in the safety, quality and production of their solar projects. In the past, we have successfully completed various solar projects at one time. It is this teamwork that separates CUBICSO. from our competitors.

Experience:

Our expert team has executed More than 150 MW of Solar Installation across India . For the Clients/Principal clients Like BHEL, GSECL, GNFC, TATA SOLAR PROJECTS. Our Team is executing Projects in Floating Solar also.

POLICIES

QUALITY POLICY

CUBICSO will make quality a way of life. Quality is the result of good management and will be achieved by the way we get the right things done.

We believe there is always a better way to provide services to our clients and strive for continuous improvement. In rendering our services we will optimise resource utilisation and commit ourselves fully to the task at hand. We consider meeting client requirements as the minimum performance criteria and aim to surpass expectations.

HSE POLICY

POLICY

CUBICSO is committed to a clean, safe and healthy environment for our employees, contractors, customers and the communities around us.

All employees and contractors forming part of the CUBICSO service, have a duty to prevent harm to themselves, to others and to the environment.

CUBICSO will comply with all the applicable legislation, regulations and customers' requirements as minimum benchmark for its Health, Safety and Environment (HSE) Policy.

CUBICSO will regularly review this policy, practices and performance to ensure ongoing improvements.

OUR TEAM & EXPERIENCE

Our team is flexible and able to adjust to clients' specific needs with respect to geography, internal processes and systems, as well as the availability of resources. The core team of project managers consists of graduate civil, mechanical and industrial engineers, with inhouse Cost Management, Quality Control and Administration Support complementing our service delivery.

We have been involved in projects of repetitive nature and are in a position to package total solutions in a Turnkey format for similar projects. This includes the sealing of redundant mine shafts, security installations, box cut developments, underground mine access, fuel and lubrication storage facilities, legacy rehabilitation, ventilation shafts, conveyor systems etc.

Although it is preferable for formal project management to be included as early as possible in the life cycle of a project and remain included until closure, we have with success completed stand-alone activities and phases in project life-cycles, such as feasibility studies (Power Plants development, facilities relocation, Boiler Erection), implementation planning, risk assessments etc. Some of our most successful ventures have arisen from being appointed to perform project status audits on “in trouble” projects and the subsequent appointment to get the projects back on track towards completion. Although this is not “the ideal” type of project, we pride ourselves in the fact that we have the skills and tenacity to get involved and ensure eventual success.

Client Experience:

For over six years we’ve built our reputation on values and a strong commitment to providing professionally safe and quality construction services to our clientele. Our commitment to you is far more than professional: it’s personal.

Our goal is to build a relationship with our clients as well as our employees, and to provide a balance between the needs of our Clients and the needs of our workforce, with our critical eye toward safety, quality and service. The relationships we build have been the foundation of CUBICSO. and have led to many repeat clients and a dedicated team, which makes CUBICSO. successful in such a competitive industry.
